

# YRG Series

Three fingers type

# YRG-2004T

## Basic specifications

Model name	YRG-2004T	
Model number	KCF-M2015-A0	
Holding power	Max. continuous rating (N)	2.5
	Min. setting (% (N))	30 (0.75)
	Resolution (% (N))	1 (0.025)
Open/close stroke (mm)	3.5	
Speed	Max. rating (mm/sec)	100
	Min. setting (% (mm/sec))	20 (20)
	Resolution (% (mm/sec))	1 (1)
	Holding speed (Max.) (%)	50
Repetitive positioning accuracy (mm)	+/-0.03	
Guide mechanism	Linear guide	
Max. holding weight <sup>Note 1</sup> (kg)	0.02	
Weight (g)	90	

• Holding power control : 30 to 100% (1% steps) • Speed control : 20 to 100% (1% steps)  
 • Acceleration control : 1 to 100% (1% steps) • Multipoint position control : 10,000 max.

Note. Design the finger as short and lightweight as possible.  
 Note. Set the parameters and holding power (%) of the holding movement command so that any excessive shock is not applied to the finger during operation.

Note. When installing or uninstalling the finger, tighten the bolts while the finger is being held securely so that any excessive force or shock is not applied to the guide block.  
 Note. Workpiece weight that is able to be held may greatly vary depending on the material, shape, and/or holding surface conditions of the finger.

Note 1. Design the weight of a workpiece to be held so that it is approximately 1/10 to 1/20 of the holding power. (Consider further allowance when moving and swinging the gripper that keeps holding a workpiece.)

## Gripping power vs. gripping power setting (%)

• Graph shows a general guide to gripping power versus gripping power setting (%). Variations will appear in the actual gripping power.

## Allowable load and load moment

		YRG-2004T	
Finger	Allowable load	N	6
	Allowable pitching moment	N·m	0.02
	Max. weight (1 pair)	g	10
	Max. holding position	L mm	15

• When the external forces  $F_a$  and  $F_b$  are applied to a portion the distance (L) apart from the finger installation surface, the load (F) and moment (M) are calculated from the formulas shown below.

$$F = F_a + W \times g$$

$$M = F_b \times L$$

$F_a$  : External force [N]  
 $F_b$  : External force [N]  
 $W$  : Workpiece weight [Kg]  
 $g$  : Gravity acceleration [m/s<sup>2</sup>]  
 $L$  : Distance of holding point [m]

$F$  : Load [N]  
 $M$  : Moment [N·m]  
 $L$  : Distance of point of external force application [m]

## YRG-2004T

Note. Avoid extreme winding of the cable and fix the cable securely so that it does not move. Take appropriate measures so that any excessive force is not applied to the root of the cable.

Three fingers type

# YRG-2013T/2820T/4230T

## Basic specifications

Model name	YRG-2013T	YRG-2820T	YRG-4230T	
Model number	KCF-M2015-B0	KCF-M2015-C0	KCF-M2015-D0	
Holding power	Max. continuous rating (N)	2	10	20
	Min. setting (% (N))	30 (0.6)	30 (3)	30 (6)
	Resolution (% (N))	1 (0.02)	1 (0.1)	1 (0.2)
Open/close stroke (mm)	13	20	30	
Speed	Max. rating (mm/sec)	100		
	Min. setting (% (mm/sec))	20 (20)		
	Resolution (% (mm/sec))	1 (1)	1 (1)	1 (1)
	Holding speed (Max.) (%)	50	50	50
Repetitive positioning accuracy (mm)	±0.03			
Guide mechanism	Linear guide			
Max. holding weight <sup>Note 1</sup> (kg)	0.02	0.1	0.2	
Weight (g)	190	340	640	

- Holding power control: 30 to 100% (1% steps) • Speed control: 20 to 100% (1% steps)
- Acceleration control: 1 to 100% (1% steps) • Multipoint position control: 10,000 max.

Note. Design the finger as short and lightweight as possible.

Note. Set the parameters and holding power (%) of the holding movement command so that any excessive shock is not applied to the finger during operation.

Note. When installing or uninstalling the finger, tighten the bolts while the finger is being held securely so that any excessive force or shock is not applied to the guide block.

Note. Workpiece weight that is able to be held may greatly vary depending on the material, shape, and/or holding surface conditions of the finger.

Note 1. Design the weight of a workpiece to be held so that it is approximately 1/10 to 1/20 of the holding power. (Consider further allowance when moving and swinging the gripper that keeps holding a workpiece.)

## Allowable load and load moment

		YRG-2013T	YRG-2820T	YRG-4230T	
Finger	Allowable load	N	20	30	50
	Allowable pitching moment	N·m	0.1	0.2	0.4
	Max. weight (1 pair)	g	20	30	50
	Max. holding position	L mm	20	30	40

• When the external forces Fa and Fb are applied to a portion the distance (L) apart from the finger installation surface, the load (F) and moment (M) are calculated from the formulas shown below.

$$F = Fa + W \times g$$

$$M = Fb \times L$$

Fa : External force [N]  
 Fb : External force [N]  
 W : Workpiece weight [Kg]  
 g : Gravity acceleration [m/s<sup>2</sup>]  
 H : Distance of holding point [m]

F : Load [N]  
 M : Moment [N·m]  
 L : Distance of point of external force application [m]

## Gripping power vs. gripping power setting (%)

• Graph shows a general guide to gripping power versus gripping power setting (%). Variations will appear in the actual gripping power.
